## About Me

I am passionate about data and technology, with experience leading teams and technological projects from start to finish. My focus is on inspiring multidisciplinary teams, fostering innovation, collaboration, and continuous learning. I leverage agile methodologies and advanced tools to deliver creative solutions that drive tangible impact, aligning strategic goals with measurable outcomes. My goal is to further specialize and lead innovative projects that turn challenges into opportunities.

## Data Skills

- Python
- Data mining
- SQL
- Postgres
- Machine learning
- Deep learning
- Automatizations
- Web scraping
- NLP
- Looker studio
- Power BI
- IA Agents
- N8N

## Coding Skills

- React
- JavaScript
- TypeScript
- HTML
- CSS - SCSS
- Tailwing
- Node.js
- Sequelize
- Express
- AWS services

## Other Skills

- Self-taught
- Leadership
- Communication
- Planning
- Agile Methodologies
- Activity Organization
- English C1
- Notion
- Figma
- Pixlr

## Scientific articles

- [Artificial Intelligence applied to housing risk: a review of the literature](#)  
**Publication status: Approved**  
Cuaderno Activa - 2023
- Proposal for a Web Application to Alert About Housing Collapse Risks Due to Structural Failures Using an Expert System Based on the NSR-10 Standard in the Aburrá Valley.  
**Publication status: Pending**  
Cuaderno Activa

## Education

- Systems engineer**  
Luis Amigó Catholic University  
2019 - 2023
- Neural Network Programming**  
University of Antioquia  
Dec - 2023
- Data Science - Artificial Intelligence**  
University of Antioquia  
Nov - 2023
- English - C1 Advanced**  
EF SET  
Oct - 2023
- Data Management with Power BI**  
Pascual Bravo University  
Sep - 2023
- IBM Data Science Professional certificate**  
IBM - Coursera  
Sep - 2023

## Experience

- IT Leader**  
LOKL  
Currently  
Sep - 2024
  - Develop technological solutions to address various business challenges.
  - Plan, coordinate, and execute features on the company's website to enhance the business, increase customer loyalty, improve NPS, and attract traffic.
  - Build functionalities using technologies such as React, Next.js, and TypeScript.
  - Develop the company's business logic through backend services and APIs using technologies like Node.js, Express, Sequelize, PostgreSQL, and AWS services.
  - Lead development teams in web development, data analysis, and graphic design, focusing on driving the company's growth through technology.
  - Implement AI solutions to streamline operations, such as chatbots using Python and n8n, to manage clients at scale and automate operational tasks.
  - Deploy BI tools to visualize valuable business indicators effectively.
  - Design and execute BI strategies and market analysis projects using tools like web scraping to create dashboards for instant real estate market insights.
  - Create workflows and automate processes to optimize efficiency.
- Business Intelligence Analyst**  
LOKL  
Sep - 2024  
Jun - 2024
  - Extract data from multiple sources (databases, APIs, spreadsheets, marketing tools, etc.).
  - Clean and transform data to ensure its quality and consistency.
  - Automate processes for data collection and preparation.
  - Analyze trends, patterns, and opportunities using analytical tools.
  - Identify key performance indicators (KPIs) relevant to the organization.
  - Implement tools and processes to automate analysis and reporting.
  - Optimize existing BI models and systems to enhance efficiency.
  - Ensure the integration of new data sources or technologies into current systems.
  - Collaborate with marketing, sales, operations, and finance teams to understand their needs and objectives.
  - Provide insights to improve processes, optimize resources, and support informed decision-making.
  - Design data-driven strategies to enhance business performance.
- Software Engineer Intern**  
Tuya S.A  
Jul - 2023  
Jun - 2023
  - Solution-oriented software development to address business challenges. Designed and developed a program to enable life insurance management for Tuya's advisors, utilizing technologies such as React, TypeScript, and SCSS.
  - Applied agile methodologies, fostered collaboration using GitHub, and worked with designs created in Figma, ensuring seamless teamwork throughout the project. Proposed a web architecture to support dynamic designs tailored for the company's various providers.
- Software Engineer**  
Ingenio matematico  
Dec 2022  
Jan 2022
  - Developed a website focused on recreation and learning for students, including the creation of basic learning modules using technologies such as HTML, JavaScript, and CSS.
  - Integrated educational video games into the website to enhance the learning experience and engagement.

## Freelance Work

- Sales Performance and Customer Experience BI**  
Ana Salcedo  
Apr 2025  
Feb 2025  
**Sales leader in Arpis, CSS y Believe | +57 3043263673**  
Developed a dashboard in Looker Studio to provide comprehensive oversight of sales and customer management across various businesses and brands. The dashboard includes temporal charts, conversion rates, closure probabilities, and customer journey funnels. Additionally, it features customer satisfaction analysis with key metrics such as NPS (Net Promoter Score), CSAT (Customer Satisfaction Score), and CES (Customer Effort Score).
- Funlam research projects**  
Juan Sebastián Parra Sanchez  
Nov 2023  
Ago 2023  
**Professor at the Luis Amigó Catholic University | +57 3113118071**  
Data processing and cleaning were performed, integrating multiple data sources and creating scripts to streamline information processing. Database models were migrated and optimized to support the development of a website showcasing processed and curated data on various research projects at the Catholic University Luis Amigó. This platform was designed to encourage students to explore and enroll in research projects that align with their interests.
